

Looking To Hire Photoshop Artist/Painter

Type of work: Preparation of PSD files via cropping and painting for Animator to work with.

Illworks Introduction

We are a creative Motion Graphics & Animation Studio. We believe in putting out stellar work for our clients that will “blow the minds” of the audience. We aim to leave the viewer having to acknowledge our work when seen on screen. We believe in creating and delivering quality work on schedule so our clients can sleep easy knowing we are on the job.

Personality Type

We are looking for creative, talented, clever, positive, proactive, solution driven individuals who are able to work with others to create amazing graphic elements following a certain style/theme. Must have the willingness to deliver their best work possible. Applicant must also be efficient with time and the ability to cope and deal with pressure if it arises with a positive and calm attitude to complete the job. Applicant be able to understand to put ego aside when client asks for revisions.

Job Summary/Description

The job would entail creating/prepping graphic elements in Photoshop tailored for a motion graphics artist to use to animate in After Effects with the end goal of a **Photo Parallax effect**. We are looking for someone to crop out elements very clean as well as paint out backgrounds fully by any means (meaning if you have to add or use other photos to create a background)

Style References:
